WHOLE LIFE COSTS FROM TOPCALC™

DRIVING BETTER DECISIONS

MAXIMUM MILEAGE FROM YOUR DATA.

www.idsgroup.com

01

IN THE KNOW. **IT'S SURPRISING HOW, WITHOUT KNOWING, YOU CAN PAY TOO MUCH...**

TopCalc's whole of life costs, total cost of ownership and data provides instant access to On The Road (OTR) prices, residual value forecasts, maintenance costs, fuel consumption and insurance ratings as well as full specification details for some 8,000 new cars and light commercial vehicles.

A wide range of reports can be compiled within TopCalc and users are able to produce a schedule of 'best buys', as well as company / employee acquisition lists sorted by purchase price, P11D price or Whole of Life Cost.

TopCalc also details CO₂ emissions and enables users to compare same sector vehicles to focus on those with the lowest emissions.

FLEET COSTS.**

02

TOPCALC™ GIVES YOU THE INFORMATION YOU NEED; ENABLING YOU TO MAKE THE RIGHT CHOICES.

Whatever the size of your fleet, TopCalc puts you in the driving seat when it comes to the true cost of company car or van ownership.

For the smaller fleet

Ideal for smaller fleets (up to 250 vehicles). The data is presented in a simple look-up format for a range of profiles.

For the larger fleet

You will most likely want to input your own parameters to ensure that the TopCalc data accurately reflects your specific circumstances. A 'user defined' model, TopCalc PLUS, is available which allows the user to input manufacturer discounts, insurance & capital funding costs.

For every fleet

Comparisons of CO₂ emissions, to enable fleet managers to make a real contribution to driving down an organisation's carbon footprint.

The latest data

Using TopCalc, you can be sure that you always have the latest data. You also get an industry-wide perspective on key data such as residual values.

Integral data source

All core data (pricing, specifications, options, technical, etc.) is supplied by IDS DataDirect from information sourced directly from the manufacturers. Residual value figures are drawn from our own independently researched and maintained valuation databases. SMR costs are compiled in our own detailed SMR database using manufacturer indicated service and parts costs and IDS's own market research.

TOPCALC™ FOR BETTER DECISIONS. OVER 8,000 NEW CARS AND LCVs...

The database

For every vehicle:

- **Default price + discounts, residual values, maintenance budgets;**
- **Any period between 1 and 5 years;**
- **From 1 to 200,000 miles;**
- **Factory-fitted options and standard features;**
- **Insurance groups;**
- **Fuel consumption;**
- **CO₂ emissions rating;**
- **Manufacturer's published delivery charges.**

TopCalc builds its information on an item-by-item basis covering:

Depreciation: Difference between OTR price and forecast residual value (based on the independent IDS view or amended with your own adjustments).

Maintenance: Realistic figures compiled by comparison with various external sources and incorporating manufacturer's recommended scheduling, parts and labour costs.

Fuel: From Department of Transport official figures.

Insurance: Using the Motor Insurers Group ratings as published by the Association of British Insurers.

On The Road price: Current base price plus delivery, VAT and Road Fund Licence.

Factory fitted items and specs: Collected directly from the manufacturer.

THE MOST
COMPREHENSIVE
DATABASE IN THE
INDUSTRY.

04

TOPCALC™ FOR BETTER INSIGHT.

MAKE VEHICLE
AND COST
COMPARISONS.

TopCalc enables you to make comparisons by vehicle specification or by cost parameters. You can nominate the manufacturers you wish to compare, or the vehicle features.

The standard reports suite available within TopCalc include: whole life cost, vehicle pricing, options pricing, maintenance values, residual values and residual value adjustments.

Users can compile reports to meet their own requirements using Crystal Report Writer, or any other reporting tool compatible with Oracle.

05

COMPLETE PEACE OF MIND.

Borne out of David Henley Systems, and backed by Global IDS, IDS UK has nearly twenty years' experience in compilation and testing in the market place.

Every editor on our team is individually picked on the basis of extensive used car and LCV and SMR experience.

We don't just crunch numbers; we deliver them in easy-to-use formats as an invaluable management tool for fleets and contract hire and leasing companies across the UK, collectively maintaining over 1 million vehicles.

06

GET YOUR FLEET ON THE ROAD FOR THE MOST COST-EFFECTIVE OUTLAY POSSIBLE, WITH TOPCALC™ AND TOPCALC PLUS.

To find out more about driving better fleet decisions through accurate, up-to-the-minute data, email DataSalesUK@idsgrp.com, call 01256 302000, or visit www.topcalc.co.uk.
