NEW VEHICLE SPECIFICATIONS, PRICING AND OPTIONS FROM IDS DATADIRECT™

ANY CAR. ANY VAN. ANY TIME.

MAXIMUM MILEAGE FROM YOUR DATA.

www.idsgroup.com

01

FOR NEW VEHICLE SPECIFICATIONS, PRICES AND OPTIONS, YOU WANT DATA YOU CAN USE - QUICKLY, EFFICIENTLY AND WITH CONFIDENCE.

That's exactly what IDS DataDirect™ delivers; at the most competitive pricing structure in the market.

Knowledge is power.

We enable you to make decisions based on up-to-date (updated daily) information about your vehicles; new or used, cars and LCVs.

The data arrives in the format that aligns with how you run your business; consistent with your systems. This takes out the hassle and the time that may otherwise be involved in sourcing the data yourself, in numerous formats, reformatting it to work how you want it to work, and then making sure that it is always, at all times, as accurate and up-to-date as possible.

IDS DataDirect™ is more than just data... it's power.

Our comprehensive data service provides:

- Pricing
- Specification
- Options (including Option Dependencies – must have, can't have, etc.)
- Colours and trim combinations
- Technical data
- Service maintenance data

DATADIRECT™ IS MORE THAN JUST DATA... IT'S POWER.

SAVE TIME. NO NEED TO SOURCE DATA YOURSELF.

02

VEHICLE INFORMATION AT YOUR FINGERTIPS.

International Decision Systems DataDirect™ provides comprehensive information for vehicle specification, for options including colour and trim combinations, and pricing, on over 20,000 cars and LCVs.

The information is updated daily and electronically distributed in a range of formats as a data feed for quotation systems and dealer management systems.

Detailed specification, pricing, and Whole Life Costs comparisons are available with our TopCalc™ system.

NVSP0: Cars and light commercials

Cars: The main file contains manufacturer, model and derivative information for all major manufacturers available in the UK market.

LCVs: Manufacturer, model and derivative information, from minivans to buses.

WHAT DOES DATADIRECT™ DELIVER?

THE QUICK ANSWER TO THAT QUESTION IS: NVSPO DATA YOU CAN USE, AT A PRICE THAT MAKES SENSE.

Across the UK, dealers access IDS DataDirect™ thousands of times every single day.

From some of the biggest household names in cars and LCV dealerships, through to single-franchise operations, professionals find that DataDirect answers every question and provides every piece of information easily; making business more efficient and decisions better informed.

Historical data goes back up to 8 years.

Pricing

Manufacturer's list prices. Prices cover both the vehicle in question and all Factory Fitted Options available for each specific model. Manufacturer coding for these options is also included in the detail when available from the manufacturer.

Vehicle Data

Items available cover vehicle make and model description, model year, (including part model years) and date of introduction. For each model the relevant transmission is captured, along with the CO₂ rating and its associated Road Fund Licence band.

Colours and Trims

Paint options and their associated valid trim options are provided including the Manufacturer Code where this is available.

Maintenance

Collated via the SMR module, information for service, maintenance and repair costs including tyres and MOT, for cars and LCVs, is provided in a range of terms and mileages.

Technical Data

A wide selection of data is grouped under the heading of Technical Data

covering additional information about the vehicle: Performance, Dimensions, Weight, unladen and towing capacity for cars as well as total permitted weight for commercial vehicles.

Additional Vehicle Data

Boot and fuel tank capacities, wheelbase, engine configuration, drivetrain, ground clearance, brake information, along with details about the size of tyres the manufacturers are putting on the vehicles.

Performance

Acceleration, maximum speed, BHP figures, torque @ the relevant engine speed.

Other Data

Each vehicle has its Insurance Group; whether it complies with European legislation regarding vehicle emissions, recommended Servicing intervals and manufacturer's warranty provision are all included.

Vehicle Images

A feature which provides optional images of the vehicles, at model level, is available to enable quick recognition of the vehicle being accessed or quoted upon.

04

DATADIRECT™ STANDARD EQUIPMENT

THIS FILE COVERS ALL THE STANDARD EQUIPMENT INFORMATION INCLUDED IN EVERY INDIVIDUAL MANUFACTURER'S BROCHURE;

What makes it better is that we gather it all together in one data set. It covers all manufacturer recommended colour and trim combinations; across standard, no cost and cost option items.

**WE GATHER
ALL STANDARD
INFORMATION IN
ONE DATA SET.**

DATADIRECT™ TECHNICAL DATA - CARS AND LCVs

Technical Data for Cars

Covering each individual car manufacturer, these files contain the technical data of current derivatives for each car.

The data includes

- Engine cubic capacity (cc) and drivetrain performance
- Fuel consumption
- Tyres
- Weight
- Dimensions
- Fuel tank capacity
- Insurance
- General safety rating
- CO₂ emissions

Technical Data for LCVs

These files contain the technical data of current derivatives for each LCV.

The data includes

- Cubic capacity
- Weight
- Length
- Volume
- Dimensions
- Fuel tank capacity and performance

**MORE DATA.

MORE UP
TO DATE.**

06

IDS DATADIRECT™ ENRICHES THE INFORMATION

Images:

Sometimes it's better to put a 'face to a name'; taking a look at the vehicle itself. The optional Images File includes photographic images of current new vehicles, by make and model. The file includes current and historical images, optimised for web viewing or print. Images are coded to enable linkage to appropriate data.

Descriptions - Groups and Standards:

To enable fast comparisons and effective search, this file provides standard descriptions for equipment features on new vehicles.

To find out more about DataDirect™, the cost-effective aid to vehicle pricing management, email DataSalesUK@idsgrp.com or call 01256 302000.
